

SPINAL CORD

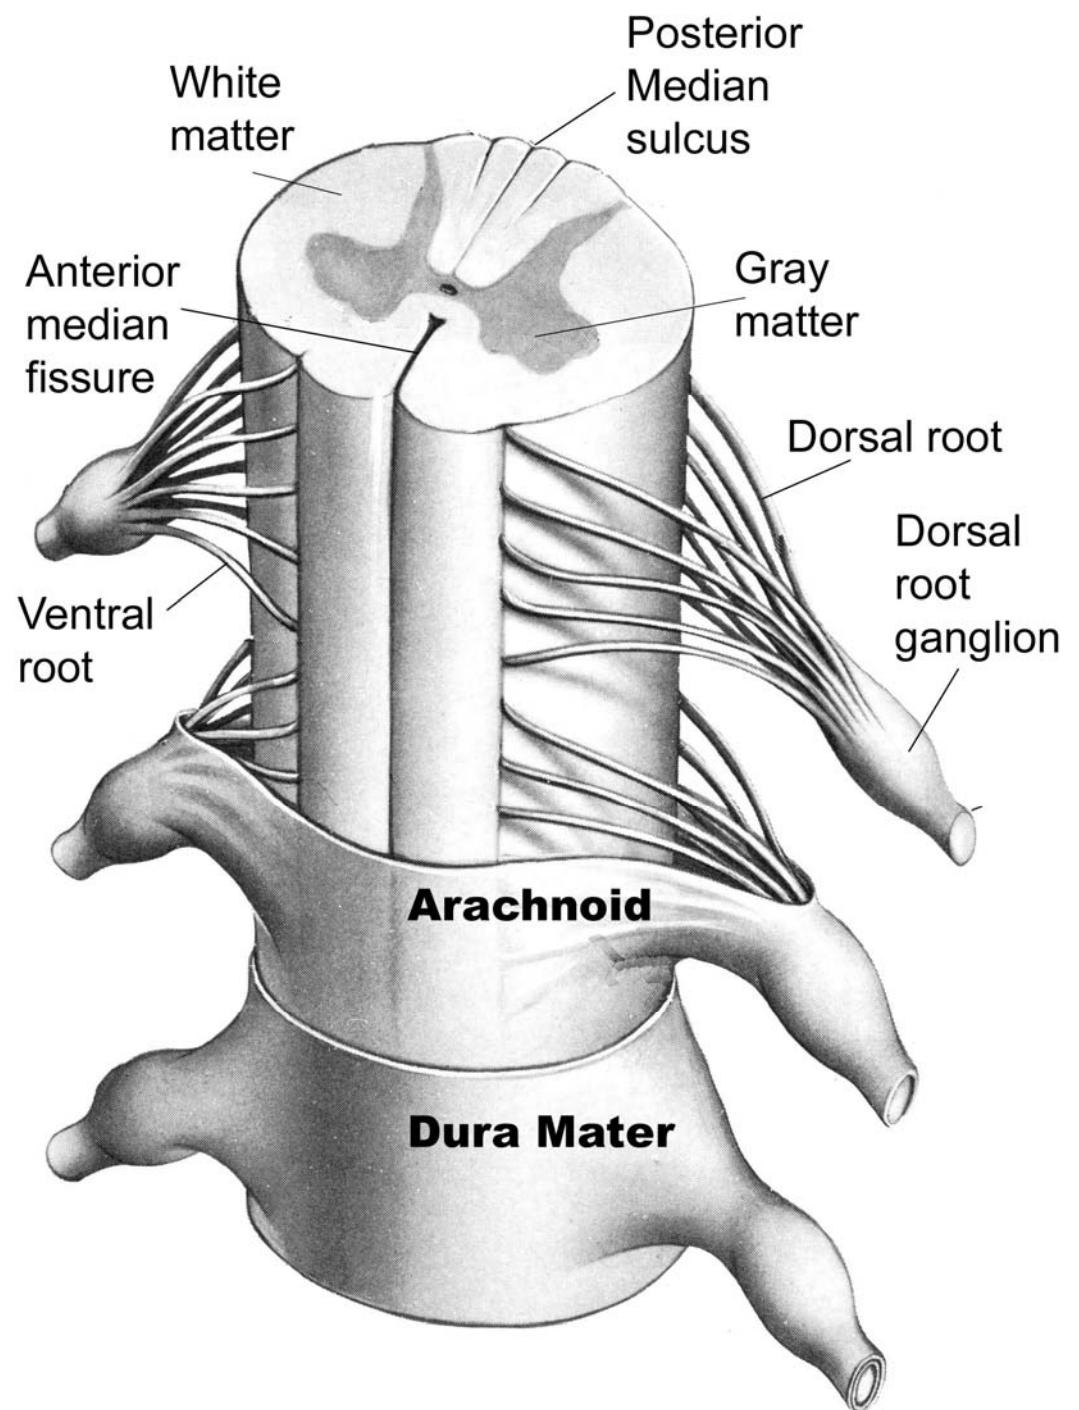

**Spinal
Nerves**

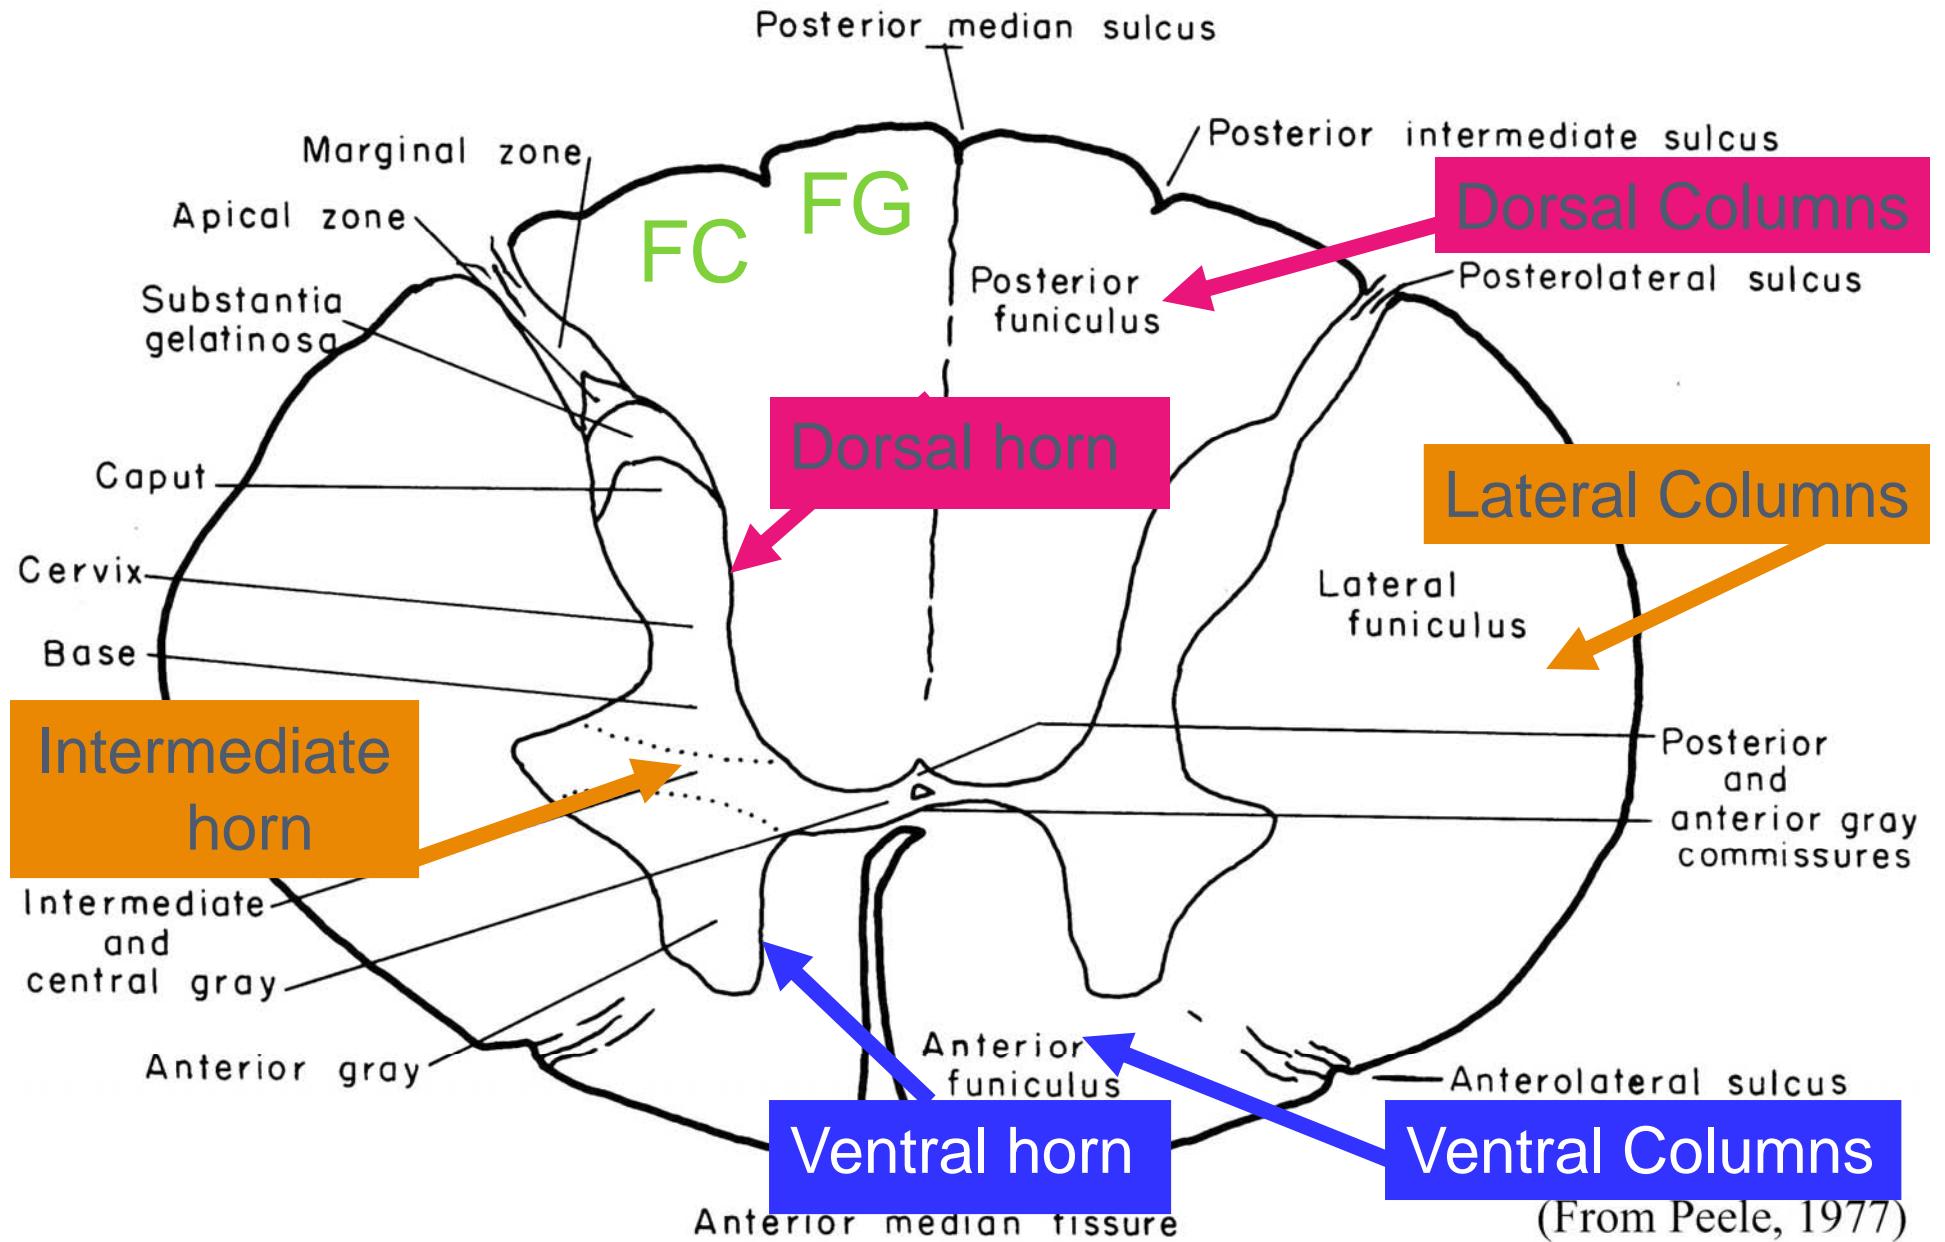

Dermatomes

Gross Spinal Cord

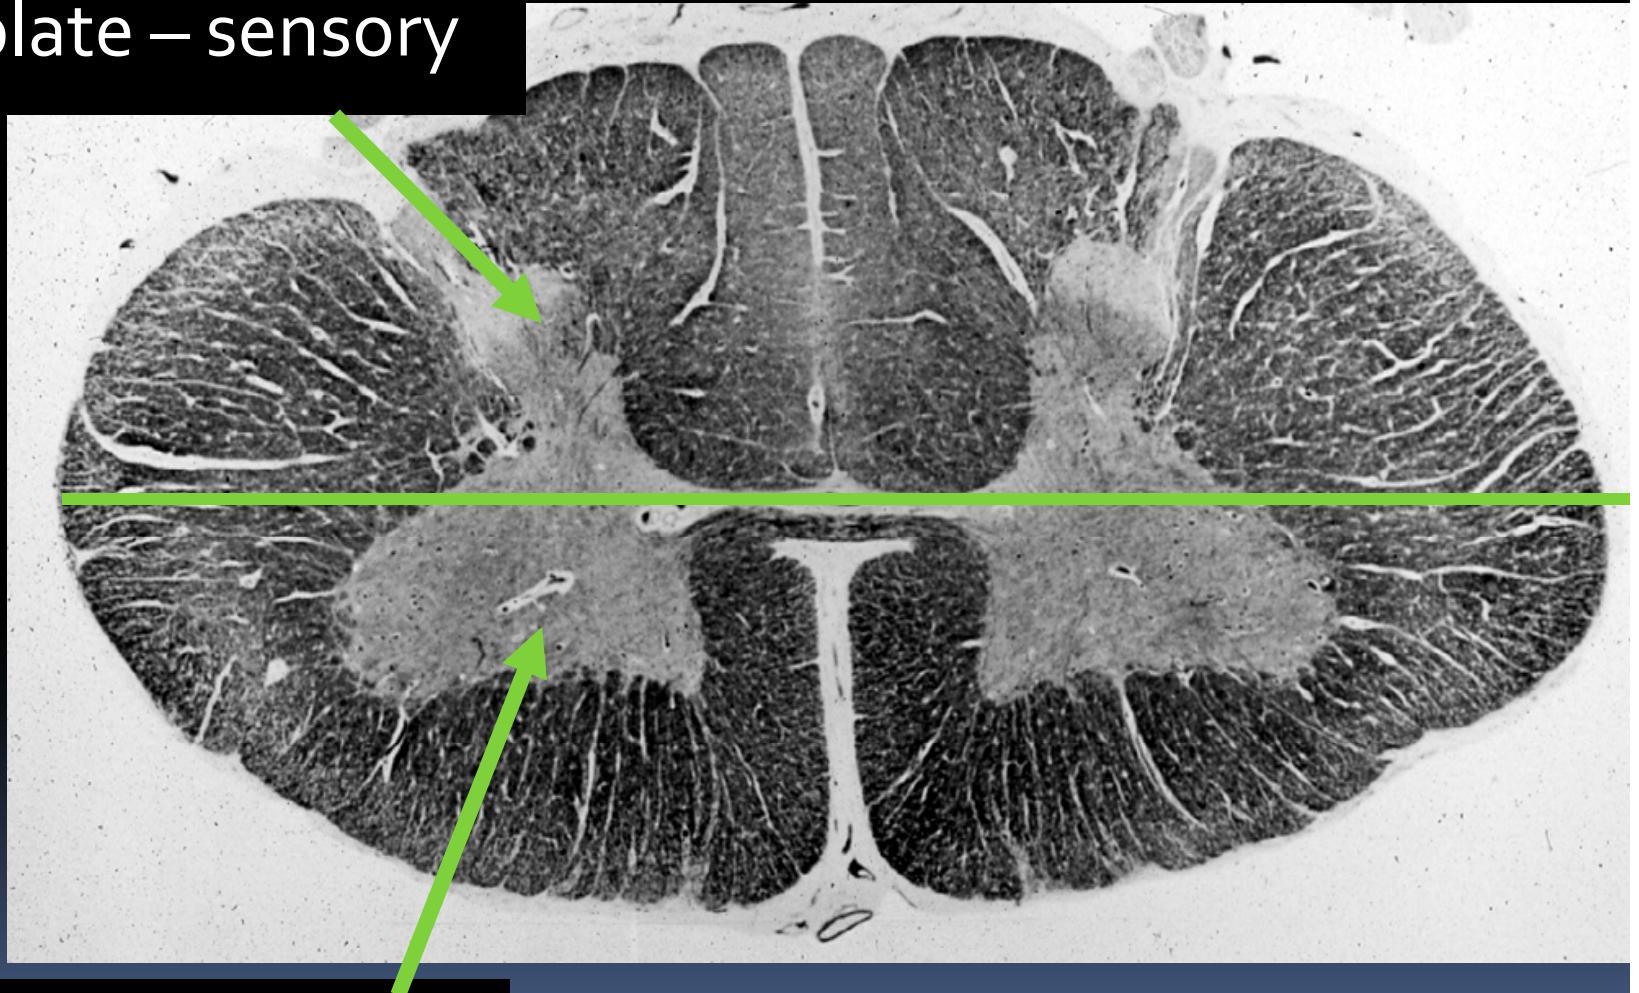

Gross Structure

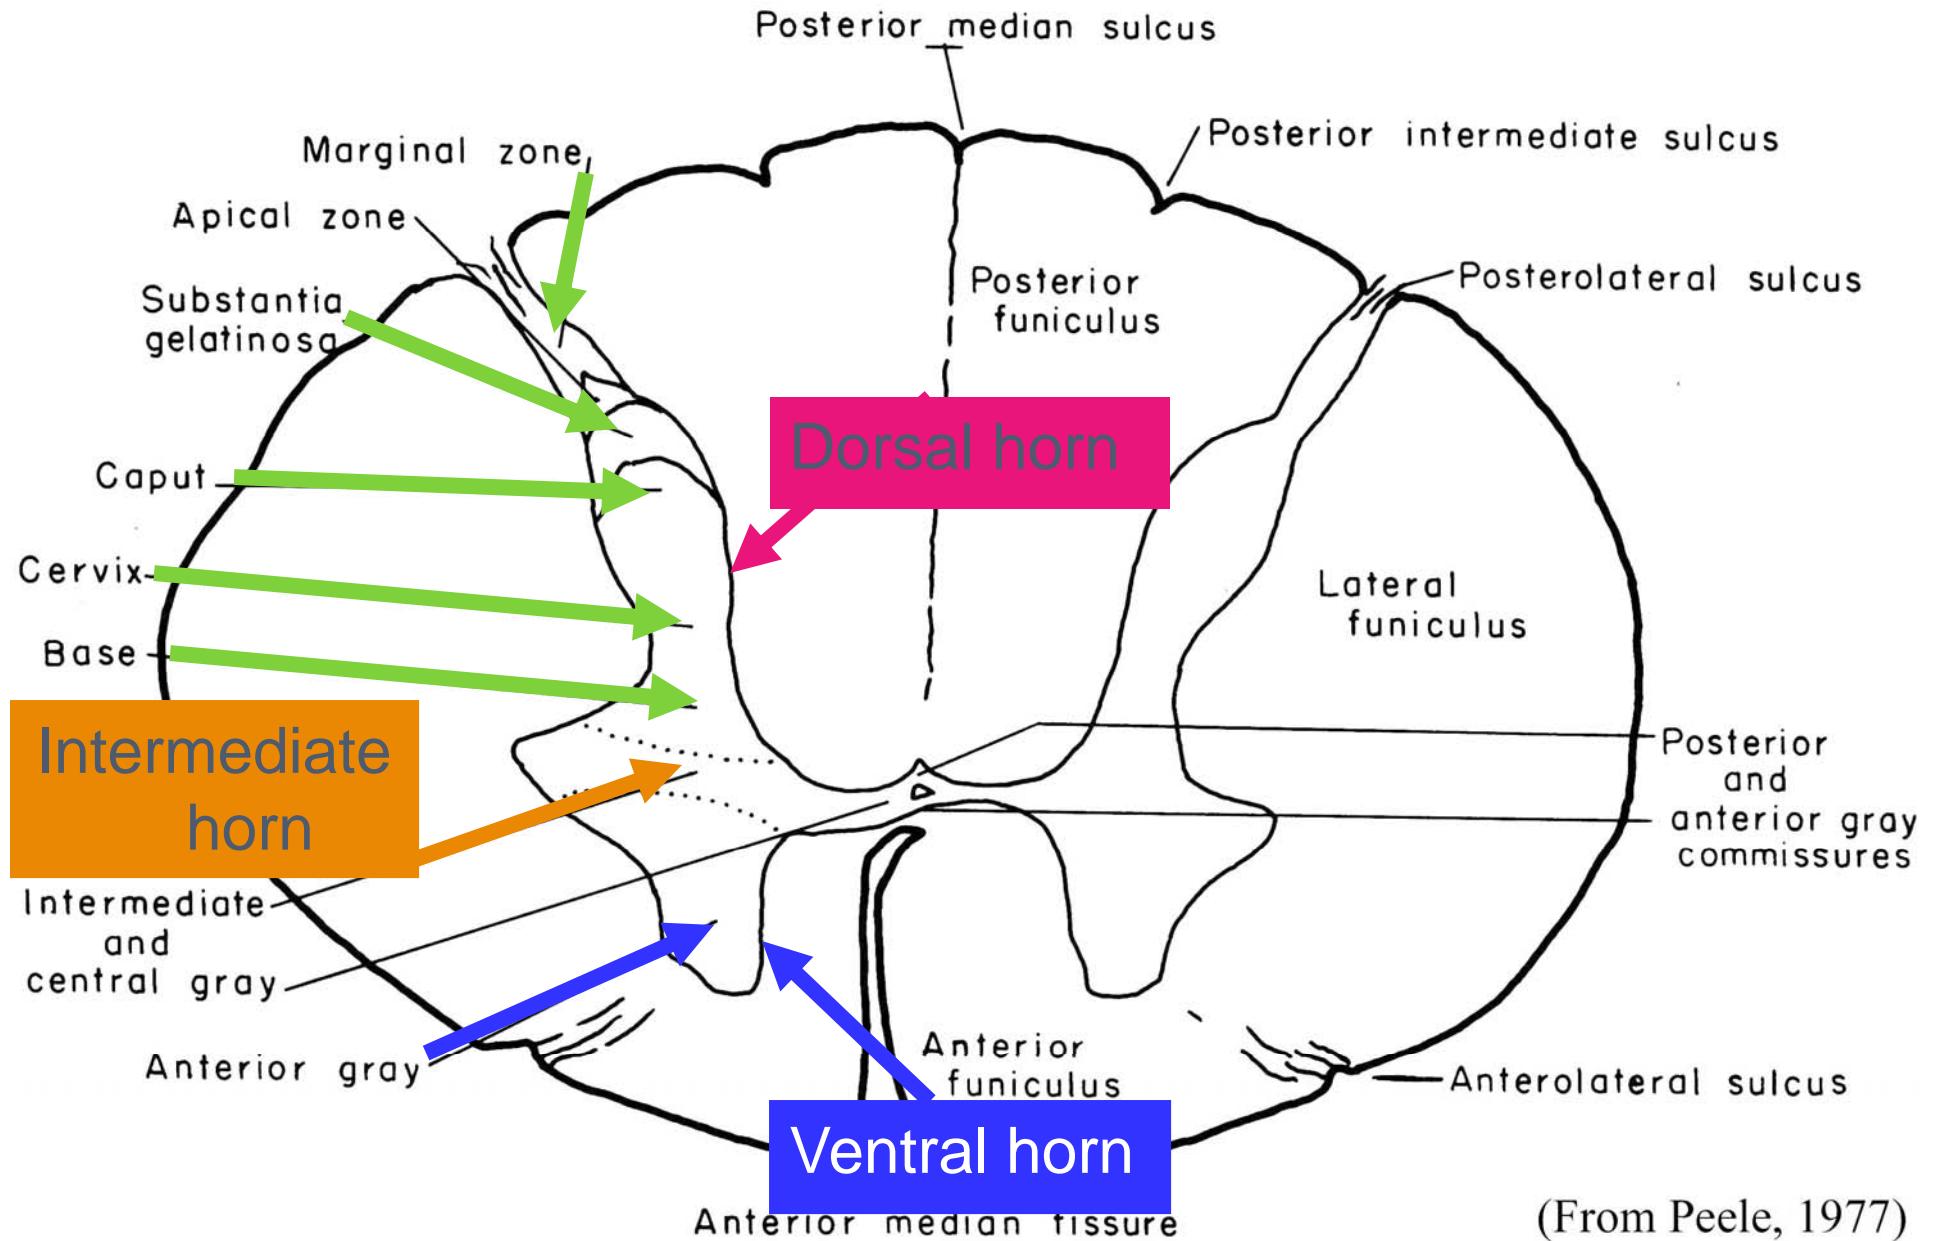

Where are the sensory and motor nuclei?

- Alar plate – sensory

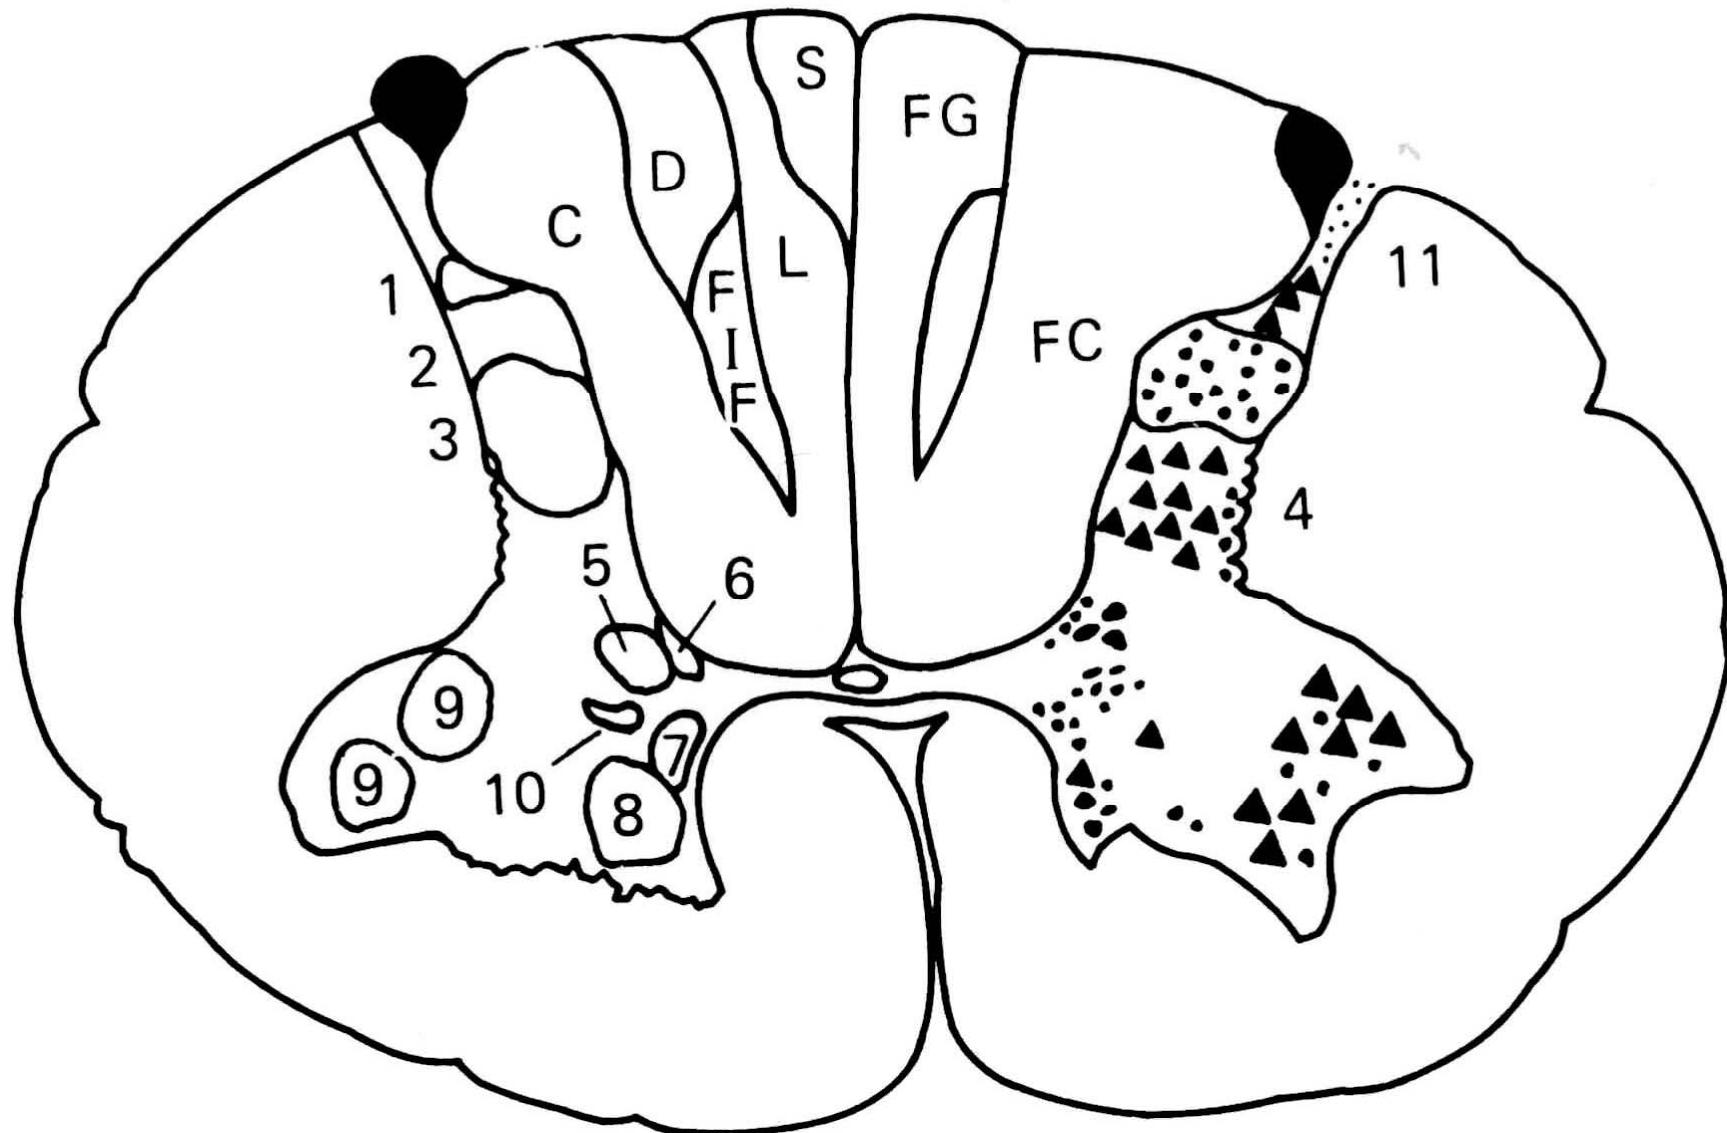

- Basal plate – motor

Gross Structure

(From Peele, 1977)

Gray Matter & Nuclear Structure

Dorsal/Sensory Organization

A. GENERAL SOMATIC AFFERENT

Proprioceptive receptor from:

- 1. Skeletal muscle
- Tendon
- Joint capsule

Exteroceptive receptors for:

- 1. Touch
- Pressure
- Heat
- Cold
- Pain

B. GENERAL SOMATIC EFERENT

Effectors as:

Motor endplates of gamma efferent axons on small intrafusal fibers of muscle spindle

Motor endplates of alpha efferent axons on large extrafusal muscle fibers

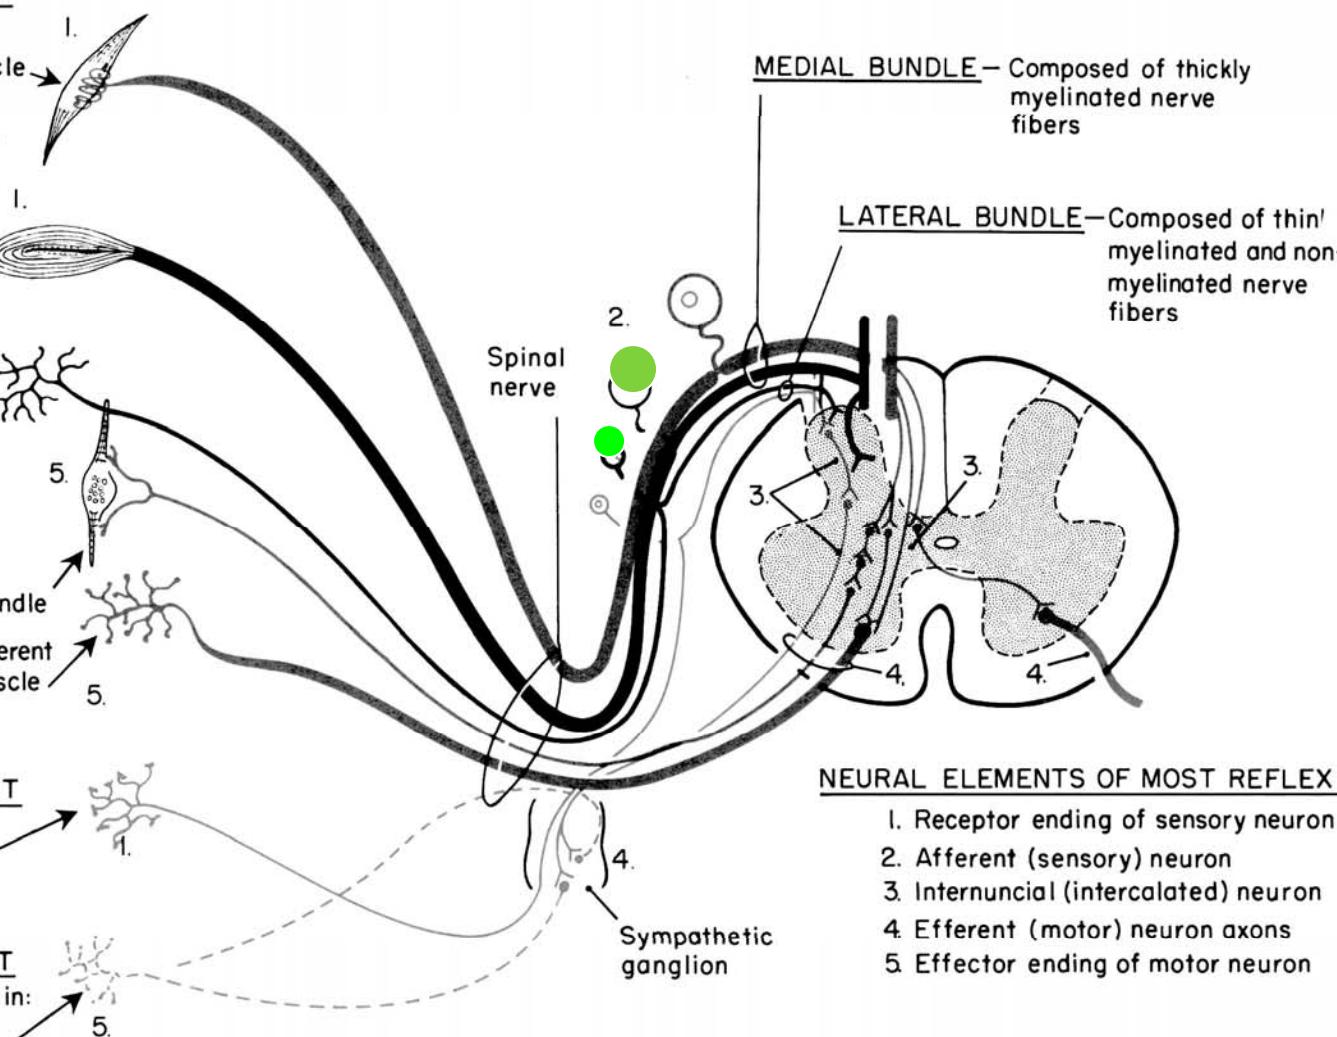

C. GENERAL VISCERAL AFFERENT

Visceroreceptive receptors for distension and spasm of smooth muscle

D. GENERAL VISCERAL EFERENT

Effectors as simple nerve endings in:

- Glandular epithelium
- Smooth muscle
- Cardiac muscle

NEURAL ELEMENTS OF MOST REFLEX ARCS:

1. Receptor ending of sensory neuron
2. Afferent (sensory) neuron
3. Internuncial (intercalated) neuron
4. Efferent (motor) neuron axons
5. Effector ending of motor neuron

Ventral/Motor Organization

A. GENERAL SOMATIC AFFERENT

Proprioceptive receptor from:

- 1. Skeletal muscle
- Tendon
- Joint capsule

Exteroceptive receptors for:

- 1. Touch
- Pressure
- Heat
- Cold
- Pain

B. GENERAL SOMATIC EFERENT

Effectors as:

Motor endplates of gamma efferent axons on small intrafusal fibers of muscle spindle

Motor endplates of alpha efferent axons on large extrafusal muscle fibers

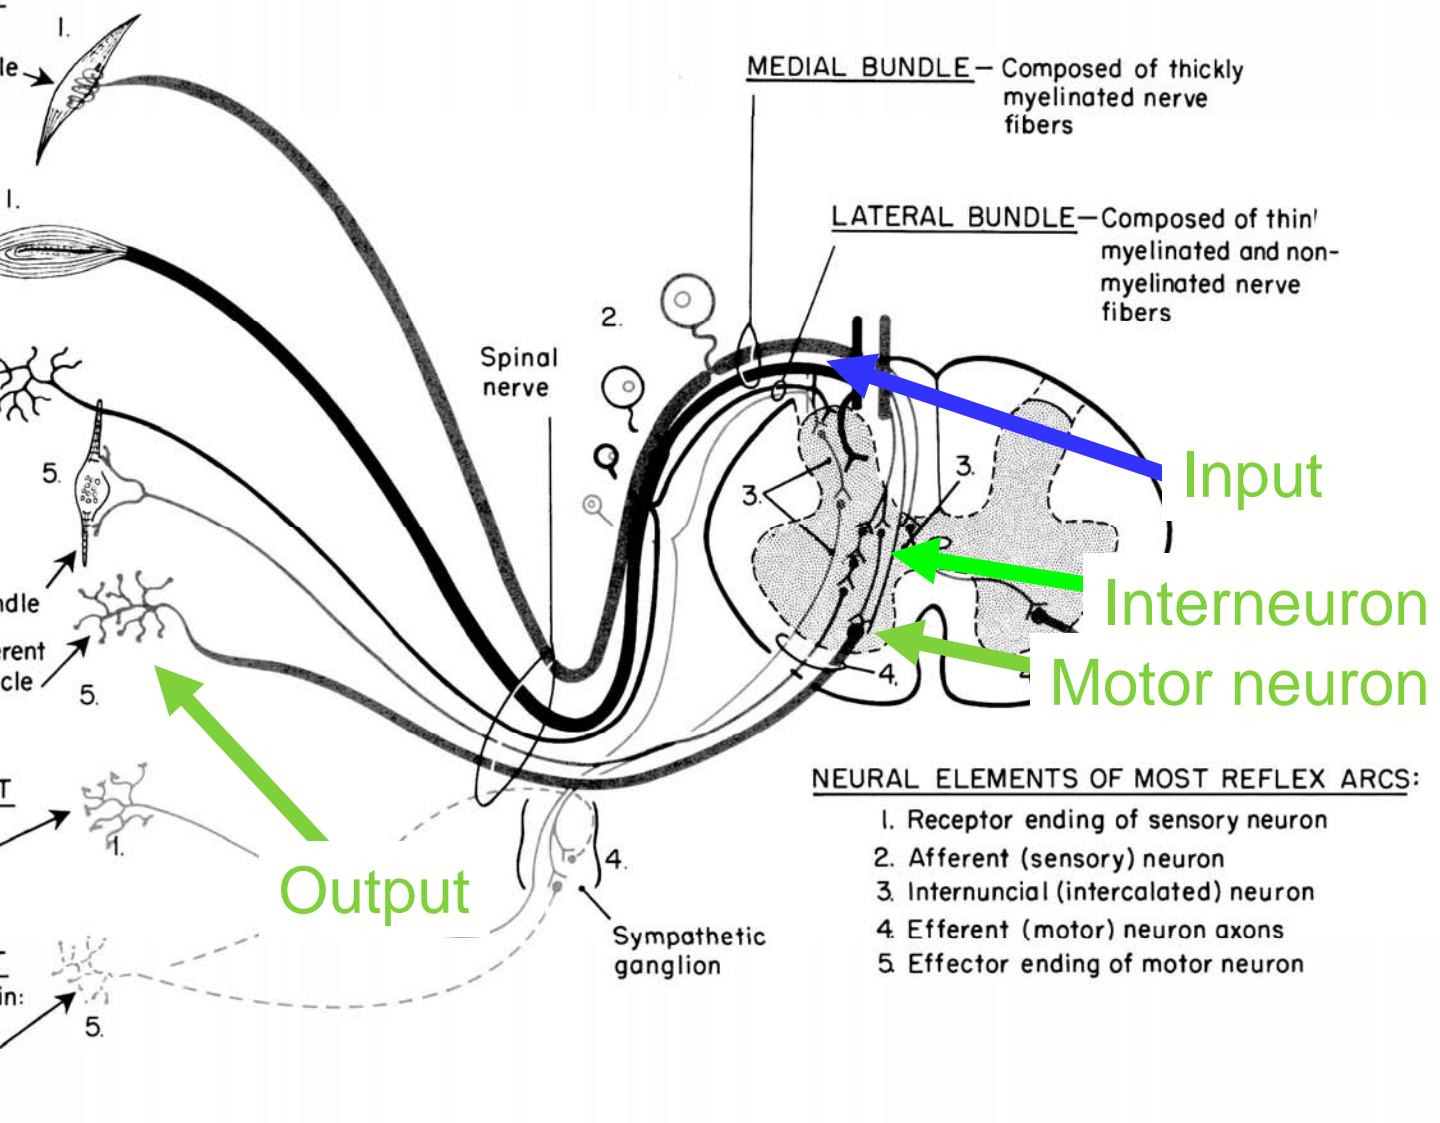

C. GENERAL VISCERAL AFFERENT

Visceroreceptive receptors for distension and spasm of smooth muscle

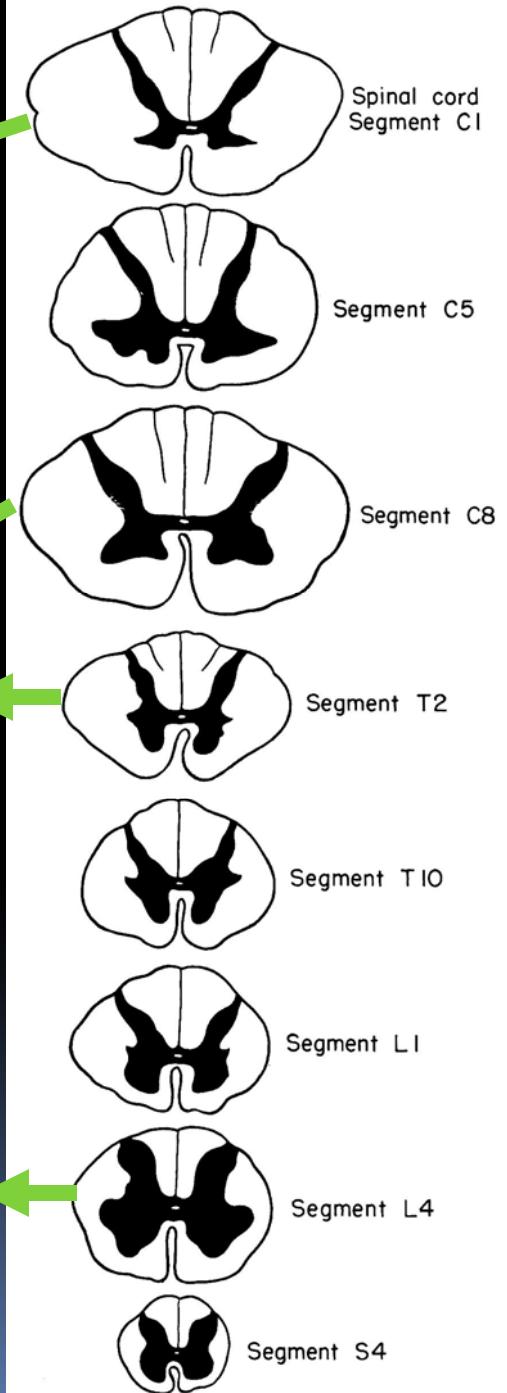

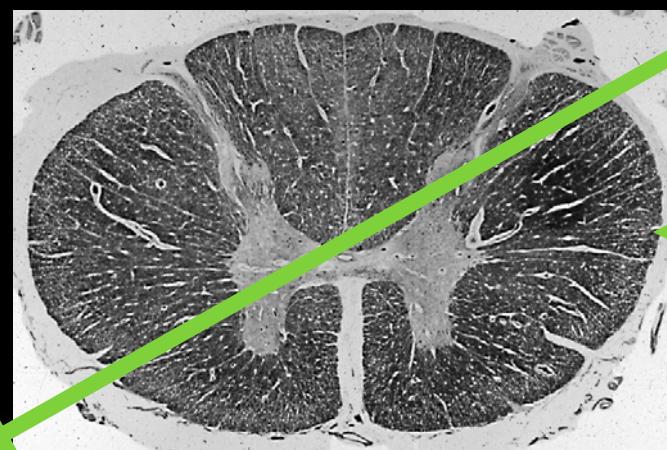

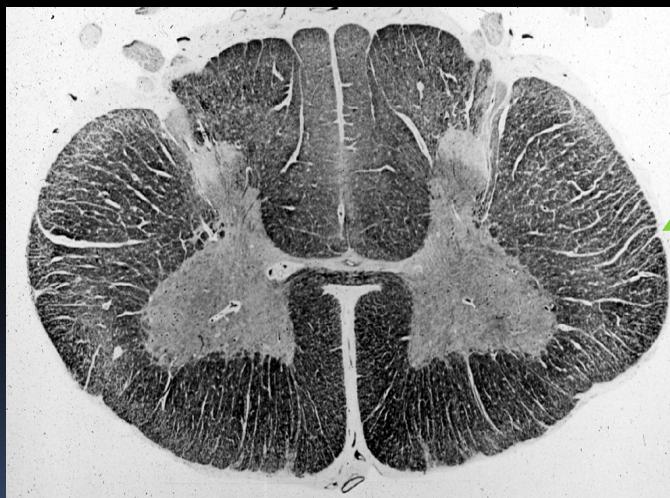

D. GENERAL VISCERAL EFERENT

Effectors as simple nerve endings in:

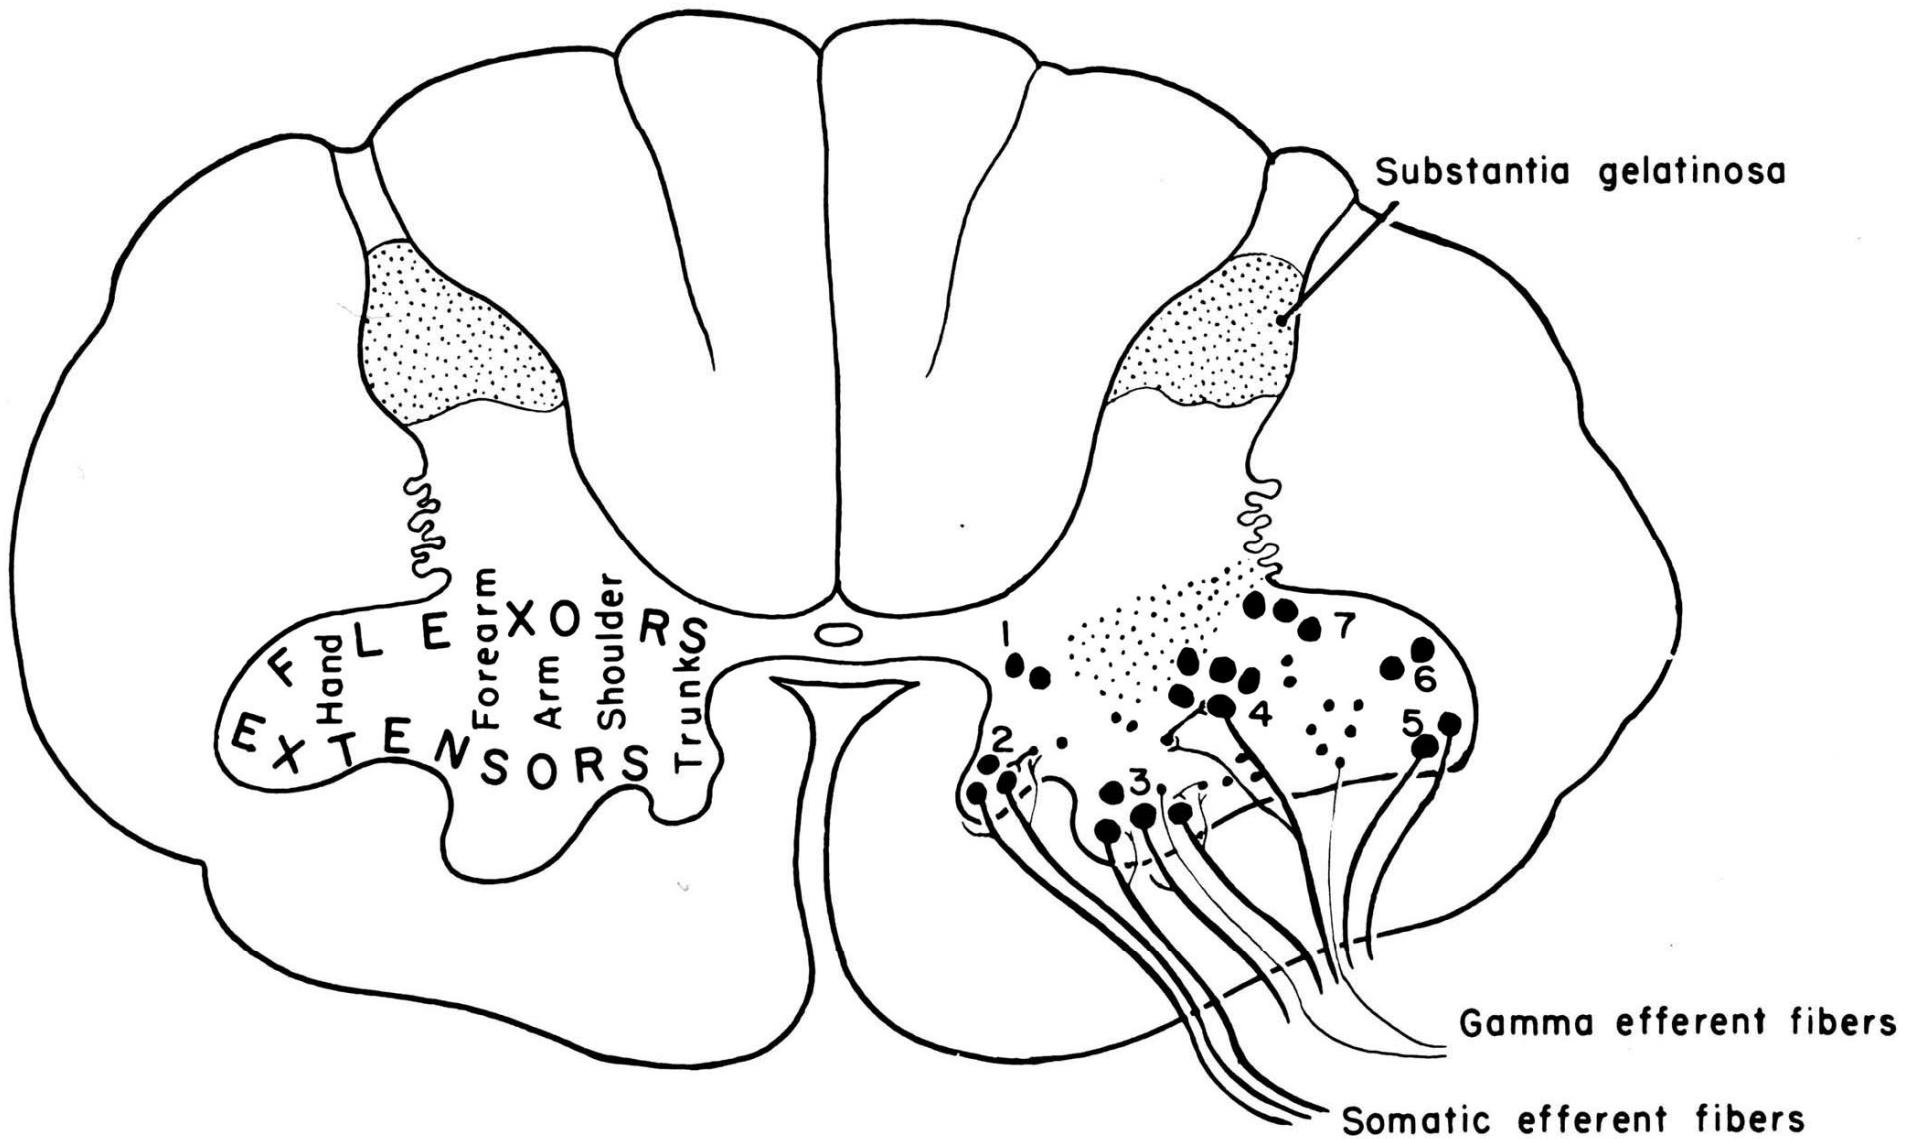

- Glandular epithelium
- Smooth muscle
- Cardiac muscle
